

Presentation title: Robot Cataloger - Using Macro Express to transfer records from MS Access to MARC format

Abstract: Students at WPI must complete 2 projects during their academic career. Written project reports have been housed at the Gordon Library for many years, but never cataloged. A web interface with the existing database allows limited searching. A stand-alone Macro recording program was used to transfer the data from MS Access into MARC records in our Voyager online catalog.

Biographical Information -- Martha Gunnarson

Martha has worked at the Gordon Library, Worcester Polytechnic Institute, since 1987. Her current job title is Assistant Director, Serials. Previously she was a cataloger for the United States Newspaper Program project at the American Antiquarian Society. Her first library job was during high school when she worked at her local public library in New Jersey. She received her A.B. degree from Clark University, and her M.L.S. from Simmons College.
